PROFILE SUMMARY

Ambitious 4th-year Computer Science student seeking experience in web or app development. Skilled in Java, Python and web technologies such as HTML and CSS, with a strong willingness to learn new tools. Eager to contribute to innovative projects while growing professionally in a collaborative environment.

EDUCATION

2021 - PRESENT
UNIVERSITY OF TWENTE

- Bachelor Technical Computer Science

2018 - 2021
LYCEE SAINTE MARIE ORATOIRE, AUCH, FRANCE

STUDY SUMMARY

The Bachelor of Technical Computer Science at the University of Twente is a rigorous degree designed to help me develop the theoretical and practical abilities required to build advanced computer systems. The curriculum emphasises project-based learning and covers topics including programming, networks, algorithms, and intelligent systems. For instance, in Module 4, I collaborated with a team to use HTML, CSS, and SQL to create a website for a business. For this project, managing and optimising data storage and retrieval required merging an effective SQL-based database with a user-friendly front end.

SKILLS

- Perfectionist
- Goal oriented
- Orderly

WORK EXPERIENCE
